EXECUTIVE PROTECTION

Distance Education

Course Descriptions

GENERAL

All ESI Distance Education courses can be purchased individually or as a complete Certificate Program. A Program is an assembly of 600 hours of self-selected Distance Education courses and a 15-Day Residency conducted in Grand Junction, Colorado. All ESI Distance Education courses have been Peer Reviewed at both the State and Federal level and delivered to student's home worldwide.

PRINCIPLES OF PROTECTION

Principles of Protection consists of the 500 page ESI VIP Protection Manual or CD Rom in Acrobat Format written by ESI staff . It is this ESI VIP Protection Manual that became the foundation of the widely respected published book by Martha Braunig, The New Executive Protection Bible. Also included in this course is The Protection Agent in the Corporate World

This course will cover both High Profile Protective Details as well as its opposite Low Profile Covert Security. The course will cover all aspects of advance work, follow-up and limousine procedures, deployment of personnel and the organization of a team detail, working the protectee, and protective hardware. High Profile Protection Details concepts are taken from Secret Service methods and former Secret Service Agents who have operationalized these concepts in private practice. The course covers personal protection services, including dignitary, celebrity and single person protection details.

LESSON INSTRUCTION:

Principles of Protection

Personnel Requirements

Follow-up and Limousine Procedures

Advance Preparations

Deployment of Personnel

Working the Protectee

Protective Intelligence

Communications

Protective Hardware

Organization of Team

Dress and Manner

Protective Techniques

Post Coverage

Protection While Traveling

Protection While Walking

Protection in Assemblies

Protection of Residence

Special Problems

Crowd Control

Handling Cranks and Stalkers

Corporate Executive Protection and Crisis Management
DISTANCE EDUCATION CLOCK HOURS:50

STALKING AND DANGEROUS HUMAN BEHAVIOR

For a number of years, ESI has emphasized the importance of Stalkers in the personal protection training regimen in both the Resident Training and this course. Indeed, included a week-long Stalker Problem in the Resident Training in Aspen that challenges the countersurveillance skills of the students.

Over the years, we have demonstrated to students the critical importance of the Protection Specialist identifying Behavioral Clues to Dangerousness and the ability to identify the discreet behavior of the Stalker in a crowd. ESI has accumulated film clips of numerous assassinations and failed attempts: Hinkley's shooting of President Reagan, Bremer's shooting of George Wallace, attempt to shoot President Park of Korea, and the attempt to kill President Ozal of Turkey, the assassination of the Prime Minister of Israel, Yitzhak Rabin, the slashing attack on President Marcos's wife in the Philippines, even the embarrassing Pie-Attack on Microsoft CEO, Bill Gates, all have important lessons to teach.

These historic events captured by the ubiquitous video camera, teach us that each of these targets were the victims of

stalkers and that this behavior is observable and identifiable. It is ESI's point of view that the behavior is also "predictable" within a certain range of certainty which equips the Protection Specialist with a forewarning. The goal of this course is to teach students how to analyze the threat of a stalker, predict "dangerousness," and develop a response strategy.

LESSON INSTRUCTION:

The Stalker Pathology

Psychological Archetypes

Obsessional Love

Stalking and Attachment

The Celebrity Stalker

The Stalked Spouse

Contact and Attempts

Logging Attempts

Dangerousness and Prediction

Laws on Stalking, Federal and State

Building a Case

When the Law will Not Due

Response and Protection Strategy

DISTANCE EDUCATION CLOCK HOURS: 50

BOMB SEARCH AND IDENTIFICATION

The Bomb Search and Identification bodyguard course emphasizes detection, not disposal, of explosive threats. Methods of search techniques are covered as well as preventive procedures to implement as policy in public buildings, including how to prepare for threatening calls. Personality profiles of bomb threat callers and actual bomber motivations are explored in detail. While we do not expect to train bomb disposal technicians, we do hope to instill a sufficient level of knowledge so that the ESI bodyguard is capable of offering intelligent advice to his employer, establishing basic safety procedures, and knowing what to do during a bomb incident.

LESSON INSTRUCTION:

Identification of Types of Explosives

Sources of Explosives

Sensitivity and Initiation: Firing Train,

Initiators, Firing Systems, Methods of Initiation

Tools of the Trade

Commercial and Military Explosives

Home Made and Incendiary Devices

Triggering Mechanisms

Search Procedures: Search of Buildings,

Vehicular Search, Boat Search, Airplane Search

Contact Agencies.

DISTANCE EDUCATION CLOCK HOURS: 50

FUNDAMENTALS OF DEFENSIVE SHOOTING

The Fundamentals of Defensive Shooting course is based upon the ESI Manual written by nationally known shooting instructor, Dick Barber, and three hours of DVD recordings of ESI Basic through Tactical Shooting Drills developed by ESI Range Master, Tony Pagni, and executed by ESI Shooting Staff and students. This course is designed for all Resident Training students as a prerequisite prior to arrival at the ESI shooting range and handling live-fire arms. In addition to the shooting drills, the course covers a broad spectrum of critical issues concerning the safe handling, carrying, and ownership of handguns. Mental aspects of training are covered in depth as well as the psychological stress of combat situations and their aftermath. Legal implications of the use of force are discussed, as well as modification of firearms.

November 26, 2008

Attached is my first course, Fundamentals of Defensive Shooting. I am very excited about this program now. This course was simply amazing. I have had training in firearms and shooting in the past but this is like food from the gods. I will be enrolling in my next course sometime in the next month or so.

Thanks again Michael McHenry

The DVD series illustrates the essential shooting skills taught at the five-day Resident Training as well as testing requirements, however, students are warned not to attempt live-fire practical exercises until they arrive for training by ESI professional shooting staff.

LESSON INSTRUCTION:
Legal and Moral Aspects

Elements of Self-Defense

Defensive Weapons

Handguns in Self-Defense

Safe Gun Handling

Range Safety

Operation of the Handgun

Theory of Defensive Shooting

Selection of the Handgun

Carrying Handguns Concealed

Back-up Guns

Selection of Ammunition

Handgun Modifications

Grips, Sights, Finishes

Range Etiquette

Static Dry-Fire

Draw and Fire

Riot Shotgun

Handgun Maintenance

Shotgun Maintenance

Night Shooting

Levels of Response

Post-Shooting Trauma

Confrontational Defense

Weapon Retention

Individual Tactics.

DISTANCE EDUCATION CLOCK HOURS: 50

HUMAN INTELLIGENCE COLLECTION & ANALYSIS

This course will focus on the human factor in the collection of intelligence. It will cover both open and clandestine sources of information. Open sources of information include newspapers, magazines, commercial news clipping services, court transcripts and filings, libraries, and public records. The clandestine sources will analyze the history and current use of undercover agents, their recruitment, training, management, evaluation and control. Once the information is collected, it must be verified in order to assure its accuracy, and then distributed to the centers of the organization that can make use of it. The student will learn all aspects of human intelligence collection.

DISTANCE EDUCATION CLOCK HOURS: 50

Background Story posted in Testimonials

FIRST RESPONDENT MEDICINE

This course is designed to prepare the student for the Resident Executive Protection Program and is based upon Brady's 6th Edition, "First Responder." Considerable emphasis is placed on emergency medical treatment in the practical components of the resident programs. The emphasis of the textbooks and video course material is on treatment of traumatic injuries. It is strongly urged that students review this portion of the Distance Education prior to coming to the Resident Training. (Note: EMTs and trained medical personnel may substitute this course with any other course offered by ESI).

LESSON INSTRUCTION:

Textbook instruction includes:

Emergency Diagnosis

ABC's of Emergency Treatment

Treatment of Wide Variety of Wounds, Burns and Injuries

Movement

Emergency Care.

DISTANCE EDUCATION CLOCK HOURS: 50

PROFILES OF TERRORISM AND VIOLENCE

Profiles of Terrorism consists of a 1,200-page manual authored by ESI, Terrorism, The Whole Story. Bodyguard students are introduced to the historical background of the terrorist movements of the 1970s through the contemporary period. The course will cover the modern organization and ideology of both left wing and right wing terrorist organizations. This encyclopedic collection of information of terrorist groups and attacks is unparalleled. The later chapters focus on contemporary terrorism of militant fundamentalist who justify their use of violence against innocent civilians with religious ideologies.

LESSON INSTRUCTION:

Historical Overview of Terrorism

Setting the Stage for Modern Terrorism

Categories of Terrorist Movements

Organizational Structure

Networks and Support

Mini-m-Manual of the Urban Guerrilla

Terrorist Group Profiles

Nationalism, Ethnicity and Insurgencies

Terrorism in the 60s, 70s, 80s and Trends for the 90s

Religious Terrorism

The Rise of Right-Wing Fundamentalism

High-Tech Terrorism

Single-Issue Terrorism

Criminal Terrorism

Future Trends

Legal Issues

Managing Terrorist Incidents

DISTANCE EDUCATION CLOCK HOURS: 50

EXECUTIVE PROTECTION DRIVING

This manual was written by ESI staff. The student bodyguard will learn the theoretical basis of anti-terrorist and evasive driving, basic driving skills and mechanics, legal considerations, armored car modifications and options. The course will cover vehicle dynamics and control, motorcades and convoy driving, road emergencies and accidents. The purpose of the Distance Education course will be to cover some of the aspects of defensive driving not covered in many driving schools. ESI no longer offers Evasive Driving as part of the Resident Training.

As the subject of Carjacking have both a Defensive Shooting component as well as Protective Driving aspect, the Executive Protection Driving course also includes an the in-depth study of carjacking. The study is written by Damian Halferty who lives and works in Johannesburg, South Africa, the carjacking capital of the world. The CD Rom course covers such subjects as the history of the crime that now plaques many cities around the globe, proactive measures, awareness drills, case studies, reactive measures, weapons and technology to combat carjackers, survival skills and the psychological post trauma of carjack victims.

LESSON INSTRUCTION:

Basic Driving Skills

Driving Under Unusual Conditions

High Speed Driving

Vehicle Dynamics and Car Control

Motorcades and Convoy Driving

Road Emergencies and Accidents

Vehicle Security and Surveillance Detection

Kidnap Strategies and Case Studies

Communications

Armored Vehicles and Car Options

Pursuit Driving

Legal Considerations

Evasive Driving Techniques

Carjacking Countermeasures

DISTANCE EDUCATION CLOCK HOURS: 50

ETIQUETTE FOR SECURITY PROFESSIONALS

Executive and dignitary protection require special attention to protocol and etiquette. Put simply, etiquette is made up of

the social tools which give the master of its knowledge confidence, control and ease in a wide variety of social situations. The bodyguard who is ignorant of the rules of social etiquette will not survive in the industry. This may be a simple familiarization with table manners, proper dress, and social intercourse, or in more precise surroundings, knowledge of social customs, cultural expectations, dignitary and political protocol. For executive level Protection Specialists, it is a survival tool no less important than a road map in a strange city.

LESSON INSTRUCTION:

Rules of Introduction: Formal and Ceremonial Official Protocol

Celebrity and Dignitary Etiquette

Conversational Rules for a Protection Specialist

Common Courtesies

Manners in Public and Private

Rules of Conduct in Foreign Countries

Etiquette in Country Clubs and Yacht Clubs

Seated Dinners, Luncheons, Receptions,

Cocktail Parties, Private and Public Balls

Travel: Foreign and Domestic, VIP, Celebrity, Political, Diplomatic

Dress: Formal and Informal, Day, Evening and Special Events.

DISTANCE EDUCATION CLOCK HOURS: 50

ELECTRONIC SECURITY

The course in Electronic Security surveys one of the most important prevention technologies available to perimeter security: electronic alarm systems. The protective specialists must be familiar with current technologies and their limitations. The course will emphasis site survey techniques, threat analysis as the preliminaries of physical security. The course will cover the different systems available for both interior and exterior sensors, their strength and weaknesses.

LESSON INSTRUCTION:

Physical Security

Threat Analysis

Site Survey

Principles of Operation and Applications

Exterior and Interior Sensors

Alarm Transmission and Control

Switching Sensors

Microwave Radar Sensors

CCTV

Signaling and Control Equipment

Power Supplies

System Design

Maintenance and Service

Electronic Countermeasures

Scanning and Countermeasures

Scramblers and Safe Phones.

DISTANCE EDUCATION CLOCK HOURS: 50

SPECIALIZED COURSES

Distance Education

Course Descriptions

SPECIAL EVENT RISK MANAGEMENT

This course will prepare the student to understand the risk management for large public gatherings such as concerts, political and special events. The course focus is the multi faceted problems that confront security specialist in everything from the Pope's visit in open air religious events to the convention center rock concert. Especially relevant for Protection and Security Specialist who work with music groups or clients who regularly appear in public events.

LESSON INSTRUCTION:

Risk Analysis and Risk Factors

Health and Safety

Crowd Management

Security Staff Recruitment and Training

General Liability and Insurance Coverage.
DISTANCE EDUCATION CLOCK HOURS: 50

ASSET PROTECTION

This course provides key information and training for strike security management and estate security. Nearly all industrial strikes entail an executive protection component. The agent must have an understanding of the law, logistics and security management of strike operations as well as the special requirements of risks to executive officers. In addition, the course covers the elementary aspects of estate security.

LESSON INSTRUCTION:

Theory of Industrial Relations

Asset Protection During Strikes

Logistics and Access Control

Command Post Operations and Emergency frMobilizations

Special Aspects of Estate Security.

DISTANCE EDUCATION CLOCK HOURS: 50

PSD PROTECTIVE OPERATIONS

Distance Education

Course Descriptions

COUNTER INSURGENCY THEORY & TACTICS

This Course collates the most recent military and civilian assessment of Counter Insurgent Warfare. Beginning with renown military theorist, William Lind and recent military manuals, it is supposed that we can not fight a war that we don't understand. While some civilian and military strategists believed the two contemporary wars are against state armed or supported forces, others believe these conflicts are fought as "asymmetrical" or low intensity operations.

This CD manual re-publishes several landmark articles that first reported the existence of holding camps known as "Black Sites", which are interment networks that the CIA utilizes as a central element of its unconventional war against Al Qaeda cells. Casting off the normal insignias of modern armies, Al Qaeda wear no uniform, swear no allegiance to any state other than their "Calling" and there is no state to negotiate a truce or armistice. To cope with the asymmetrical nature of the international terrorist campaign, the Pentagon and the Central Intelligence Agency created a multi-service elite unit to globally stalk and capture cell Jihadis. This course initiates the student into the nature of counter insurgency theory and tactics in order to enhance their understanding of the conflict of our times and generation.

INSURGENCY THEORY & TACTICS

This CD Manual begins with two mini-manuals, the first is a text by one of the rising ideological leaders of Al Qaeda, Abu Naji (a pseudonym), who wrote a strategic and tactical training manual called, The Management of Savagery. This text is the Al Qaeda playbook on how to create and manage global chaos to bring down western powers and governments that support the West. It is an extraordinary document that was recently translated by William Mc Cants, a Fellow at West Point's Combating Terrorism Center. The second Al Qaeda Manual is a document discovered in Al Qaeda safe house that expounds on the principles on military organization of terrorist cells. This book provides specific instructions on terrorist operations, including kidnapping and assassination, the use of explosives to disrupt and disable the economic fabric of enemy states. The manual gives its Jihadi members instruction on how to finance their cell

operations on a global scale by counterfeiting, forgeries and kidnapping. It expounds on the military training and weapons, communications, transportation, espionage and Special Tactical Operations as a strategy of forcing governments to disperse military and financial resources. Understand the enemy and you will understand how to fight them.

The third document consist of U.S. military anti-terrorism manuals. The first is a collection of case studies of terrorist assaults in Tokyo subway, the Federal building in Oklahoma City, the Khobar Towers and the Cole bombings. The second is a Military Guide to Terrorism in the 21st Century, which was prepared under the direction of the U.S. Army Training and Doctrine Command. These handbooks support operational missions in the global war on terrorism.

INSURGENT EXPLOSIVE DEVICES, IEDs & VIEDs

- Iraq and Afghanistan

This course consist of a careful collection of documents from government agencies and private sources that analyze a wide variety of terrorist deployment of improvised explosive devices. ATF documents the application of VBIEDs and IEDs by Al Qaeda worldwide, their targets of attack and the means of delivery. The course discusses the wide spread use of shaped charges and land mines by Al Qaeda and Insurgents in Iraq that account for more than 50% of American troop fatalities. The course covers the wide spread use of suicide bombers, their motivations, recruitment and sacrificial suicide. In addition, the course examines Al Qaeda ideology of self-sacrifice, case studies and discusses profiling of suicide bombers used by experts in the field.

The Bomb Countermeasures course was written and produced by Craig Gundry of Palladium Media Group for security professionals. This comprehensive CD Rom examines the status of explosive attacks, case studies and the history of use of munitions against political targets from the time of religious sectarian conspiracy in 1600 A.D. to bomb the British Parliament to contemporary terrorist attacks of 80's and 90's. Gundry reviews military ordnances as well as improvised explosive devices, the different types of munitions and initiating systems. A major portion of the course is devoted to teaching a student how to conduct Risk Assessment in a corporate environment, team operations in each element of security planning, Prevention, Detection, Response to Threat, Mitigation, Response to Detonation, and development of a countermeasures policy. Finally, the course examines issues of defenses against courier bombers and VBIEDs, Search & Identification, Mail Bombs, Weapons of Mass Destruction and Building Design.

PSD PROTECTIVE OPERATIONS

This course begins with the Bureau of Diplomatic Security Protocols for protective operations. The document begins with an analysis of assassinations and terrorist methods of operation. The BDS specifies the purpose and duties of Protection Agents who work WPPS details. The manual covers Protective Detail Organization, Principal Interview, Team & Staff Interaction, Team and Motorcade Formations, Operational Security and Counter Terrorist Driving. Attached to the State Department Protocols are a collection of recommendations from protective detail veterans who served in Iraq on issues of gear and equipment, survival tips and a sample advance written by an ESI graduate who is stationed in Saudi Arabia.

FIELD INTELLIGENCE FOR PSD PROTECTIVE OPERATIONS

This course contains four manuals: Human Intelligence Collection and Analysis, Deception Detection, Interviews and Interrogations, and Cross Cultural Communication. The Human Intelligence manual was written by Jack Mc George PhD., former Secret Service Agent and an ESI teacher for nearly 25 years. Jack wrote this manual for a foreign government intelligence service, and ESI for distribution in our Distance Ed curriculum. We digitized this version and sanitized the original. We integrated the course into the program, and added three other manuals that are invaluable for investigators working in the field. Two of the manuals focus on ferreting truth from subjects being interrogated based on detecting clues of deception in verbal and non-verbal communication, while the third takes into consideration cultural factors.

OPERATIONAL INTELLIGENCE

While Field Intelligence is principally focused on the collection process, Operational Intelligence is devoted to the analytical component of intelligence. This manual is dedicated to criminal and terrorist network analysis, however, the analytical model can be applied to any information rich data, including free market competitive intelligence. The introduction begins with recent historical examples of the use of a wide variety of intelligence sources: electronic, signal, human sources and network analysis to track down leaders of the insurgency in Iraq, Zarqawi and Saddam Hussein and

their global web of cells. The first manual introduces the student into the process of analysis, the tools of the trade and methodology. Link or Association Analysis is taught in simple language and demonstrates the technique of using Link Analysis model as to demonstrate the relationship between people, organizations, governments and objects. The student will learn how to use the information collection process to chart relationships and draw inferences from the facts as they emerge in the association process. Manual two is a workbook to give the student confidence to apply the technique to almost any type of problem.

PROTECTIVE INTELLIGENCE

&

INVESTIGATIONS

Distance Education

Course Descriptions

CRIMINAL INTELLIGENCE COLLECTION & ANALYSIS

This course provides an overview of intelligence collection and countermeasures. It will cover strategic and tactical intelligence as it is understood in the private security world and in the law enforcement community, and it will cover the broad issues involved with competitor intelligence and countermeasures.

The intelligence cycle begins in collection, and then flows through organization, analysis, production, dissemination, and finally protection. In this course, the student will learn how to prioritize and organize the data for analysis. He or she must then analyze the data and prepare a report. One of the objectives of an Intelligence Specialist would be to provide a plan which will fulfill the organization's collective will. The student will learn how to develop and disseminate a plan to the appropriate levels within the organization. It is essential to maintain open lines of communication with executives, and provide a rationale for alternative policies based upon realistic analysis of the data that is available.

DISTANCE EDUCATION CLOCK HOURS: 50

TELEPHONIC EAVESDROPPING COUNTERMEASURES

Telephone eavesdropping countermeasures will cover basic electricity and measurement, transmitters, overt and clandestine, telephone analyzers, and nonlinear junction detectors. Telephone intercepts will also cover areas like electronic switching systems, central office procedures, telephone testing and line tapping and tracing. The student will study telephone system design, security practices, and devices like scramblers. Finally, the student will learn effective methods of nullification and all methods of telephonic intercepts.

DISTANCE EDUCATION CLOCK HOURS: 50

SURVEILLANCE METHODS & ELECTRONIC COUNTERMEASURES

This course reviews the methods of surveillance, including mechanical, electronic, visual and optical attacks. Mechanical attacks are seen as everything from tape recording to physical capture of the information through oral or written form. Visual and optical attacks are covered as perhaps the most common, least suspected form of intelligence collection.

The student will learn various countermeasures to RF and wave transmitters, including infrared, laser and air techniques for intelligence collection. This phase of instruction will familiarize the student with detection, through systematic methods of conducting a physical search, electronic countermeasures and nullification. Electronic countermeasures will include a practical understanding of how to conduct electronic sweeps to detect radio transmitters. The student will also learn in excruciating detail how to conduct a physical search, and finally, nullification of all surveillance methods.
DISTANCE EDUCATION CLOCK HOURS: 50

INTERNAL SECURITY

This course will cover issues including personnel, document and physical security. Personnel security refers to the policies and procedures intended to determine that an individual is not now and is not likely to become a risk to security. A personnel security program is intended to prevent criminal activities by employees, espionage attempts by outside intelligence forces and unintentional acts by employees that could lead to a compromise situation. The course will cover the procedure in taking personal history statements and the follow-up investigations, and how to conduct special investigations. The course will also examine the issue of physical and document security, classification management, reproduction, disposal and transmission of sensitive or classified documents. Physical security will cover issues like the access control, security patrols, personnel identification and visitor control. In addition, it will suggest methods of detecting unauthorized intrusion or activity, alarm systems and facility clearances.
DISTANCE EDUCATION CLOCK HOURS: 50

ADVANCED INVESTIGATIONS

Distance Education

Course Descriptions

PRINCIPLES OF INVESTIGATION

The course on Principles of Investigation covers the fundamentals of investigation, the investigative process, the scope of private investigation, and the qualities of the investigator. The methods of security investigation are also taught which include undercover investigation, surveillance and stakeouts, information and evidence collection, use of informants and basics of criminal and civil scene investigation.

This course will provide the student with the basic techniques and legal aspects of undercover work to enable the student to operate effectively and safely in private investigation. The use of undercover agents is filled with legal, moral and organizational pitfalls. The course will provide valuable guidance in the selection, recruitment and training of undercover agents. It will deal with briefing for assignments, establishing cover, disguises and evaluating the information attained through the use of agents in the field.

LESSON INSTRUCTION:

The Investigative Process

Private Investigation

Methods of Security Investigation

Undercover Investigation

Information and Evidence Collection

Research of Public and Private Records

Contacts and Informants

Report Writing and Court Procedure

Observation, Description and Identification

The Business of Private Investigations.

Selecting, Recruiting and Training Agents

Establishing Cover

Disguises

Supervision and Communications

Informants and Suspects

Internal Investigations

Substance Abuse Investigations

Entrapment and Legal Issues of Undercover Work

Court Testimony

Termination.

DISTANCE EDUCATION CLOCK HOURS: 50

INTERVIEWS AND INTERROGATION

The goal of this course is to teach students the fundamental principles and techniques of successful interviewing and interrogation. It will cover such subjects as taking statements and confessions, as applied to private investigation, legal aid or law enforcement. It will delve into investigative interviews, formal statements, admissions and confessions.

LESSON INSTRUCTION:

Interviewing vs. Interrogation

Interview Preparation

Communication Skills

Investigative Interviews

Written and Oral Statements

Statements, Admissions and Confessions

Legal Issues of Interviewing

Reluctant and Deceptive Witnesses

Clues to Deception

Facial Expressions

Leakage of Expressions

Body Language and its Meaning.

DISTANCE EDUCATION CLOCK HOURS: 50

LEGAL ASPECTS OF PRIVATE SECURITY & INVESTIGATION

The design of this course is to provide the student with a basic, broad overview of the legal universe as it pertains to the actions, responsibilities, duties and authority of the private investigator. The course will focus on the methods of limiting the risk of legal entanglements, the administrative, criminal, and civil law as it pertains to private security.

DISTANCE EDUCATION CLOCK HOURS: 50
